Objective:

I am a motivated and enthusiastic software developer seeking to kickstart a career in software development in Javascript. I am eager to contribute to a dynamic team and gain hands-on experience in software development.

Skills:

Technical Skills:

- Javascript
- Database Management
- UI/UX Design
- Version Control
- Code Testing
- HTML
- CSS
- MongoDB
- PostgreSQL

Soft Skills:

Leadership

Communication

Teamwork

Presentation

Attention to detail

Problem Solving

Lean and Agile Methodology

Project management

Experience:

Software Engineering Apprentice | Laboremus Uganda | December 2023 – March 2024

Laboremus Uganda is a fintech company dedicated to developing robust financial infrastructure for financial institutions. I participated in an intensive six-month boot camp project, working with a five-member team to refine and advance my technical skills. Key contributions and learnings include:

- Applying my technical knowledge in a professional context, focusing on mastering React and Power BI.
- Engaging in collaborative project work, contributing to the enhancement of software quality and performance metrics.
- Utilization of Project management software like the Trello board.

Projects:

1. Data analysis web application

[Laboremus Uganda](#) is a fintech company dedicated to developing robust financial infrastructure for financial institutions. I participated in an intensive six-month boot camp project, working with a five-member team to refine and advance my technical skills. Key contributions and learnings include:

- The goal of addressing these key challenges was to enhance usability, efficiency, and overall satisfaction for staff and administrators.
- I managed to achieve this using different technologies, including
    - Vanilla JavaScript
    - Figma boards
    - Trello boards
    - Microsoft Teams

2. Dockville Day and Night Parking

● I was assigned to build a [record management system](#) for a Parking space during the catalyst program at Refactory Academy.
